This report, published each calendar quarter, is a compilation of employment and wage data. The information is compiled from reports submitted to the Montana Department of Labor and Industry by employers subject to the Montana unemployment insurance law. Also included in the report are similar data for federal government employees in Montana.

Employment and wages are totalled according to county, private ownership, government, and industry.

A special thank you to:

- Kate Kahle, Research Specialist, who analyzed the data and wrote the text
- Sheila Hill, who assisted in the analysis and preparation of data and maintains the program libraries
- H. Eric Johnson, Statistical Technician, who input text, created graphs, arranged, and distributed the publication.

If you have any questions, please call Kate Kahle at (406) 444-3294.

DEFINITIONS

COVERED EMPLOYER

Employers other than agricultural or domestic:

To be a covered employer, an employer must meet one or more of the following criteria:

- have an annual payroll which exceeds $1,000 in a calendar year
- acquire all or a substantial portion of a covered business, or
- be subject to FUTA

Agricultural and domestic employers:

If the employer is an agricultural entity, the employer must pay total cash wages of $20,000 or more in a calendar quarter or employ 10 or more workers in 20 different weeks in a calendar year to be covered.

A domestic employer who pays total cash wages of $1,000 or more in a calendar quarter is a covered employer.

In addition, if the agricultural or domestic employer has another business which is covered, the employer must also report its agricultural or domestic employees, regardless of the amount of wages paid or number of employees.

COVERED EMPLOYMENT

Covered employment includes all services performed for wages or under contract, unless specifically excluded by law.

Some common exclusions from covered employment are:

- individuals in employment of son, daughter, or spouse.
- children under 21 employed by parent (or partnership of parents)
- real estate or insurance salespeople paid solely by commission and without guaranteed earnings
- full-time students working in a program taken for credit
- inmates working for a state correction or custodial institution
- elected public officials
- railroad employees
- church employees
- children under 18 delivering and distributing newspapers or shopping news from house to house and business establishments
- physically or mentally impaired individuals working in a rehabilitation facility

STANDARD INDUSTRIAL CLASSIFICATION (SIC CODE)

Each business is assigned a SIC code that describes the business based upon its nature-of-business in accordance with the Standard Industrial Classification Manual, 1987 edition.

ESTABLISHMENT

Employment for a given month is the number of workers covered under the Montana unemployment insurance laws who earned wages from a reporting unit during the pay period which includes the 12th day of the month.

GROSS WAGES

Gross wages, as reported on the quarterly contribution report of employers covered by the unemployment insurance law, are the total amount of compensation paid by the employer during the quarter.

DISCLOSURE RESTRICTIONS

Publication of employment and wage data is withheld for any industry level which consists of fewer than three reporting units or in which a single establishment accounts for 80 percent or more of the industry's employment.

AVERAGE WEEKLY WAGE (AWW)

Average weekly wage (AWW) is derived from the total wages of all reported employees of any industry or major group, the average monthly employment for that industry or group during the week of the 12th of each month and the number of weeks in the quarter.

AWW is affected by large bonuses, overtime, pay premiums, part-time employment, commissions, etc. These may drastically raise or lower the statewide or county level figure.

AWW is given as a statistical figure which can be used with current employment data to evaluate and better understand the economic position of an industry or major group.

It is not the size of the average employee's paycheck.

THIRD QUARTER, 1990, IN REVIEW

- Employment change from a year ago ..... + 2.4%
- Employment change from previous quarter ..... - 0.2%
- Average Weekly wage change from a year ago ..... + 3.4%
- Average weekly wage change from previous quarter ..... - 8.0%

QUARTERLY:

Third quarter employment in Private Industry dropped minimally from second quarter 1990 employment. Seasonal layoffs in Agriculture, Construction, and Services contributed to the small decline.

Total average wages were down 8% from second quarter 1990. Private Industry reported average wages of $324 per week. Government reported a decrease of $66 per week, a 15% drop. Mining reported the highest average wages of $626 per week. Average wages of $204 per week, the lowest over all industries, were reported in Retail Trade. The largest average weekly wage increase was shown in TCPU with an additional $16 per week in wages reported. Construction and Wholesale Trade each reported an additional $11 per week.

ANNUAL:

Employment in each of the major industries except Wholesale Trade was up over 1989 third quarter figures. Services reported 2,412 more employees than the prior year, and Retail Trade reported an additional 752 employees. Agriculture and Construction had an increase of 438 and 478 employees respectively over the past year.

Wages were up slightly from one year ago. Manufacturing reported wages $4 per week lower than third quarter 1989. All other major industries reported wages higher than prior year third quarter wages.
